

PROFILE

Full-Stack Developer with hands-on experience building and maintaining production systems using React, PHP (Yii2), Node.js, and MySQL. I use AI tools daily to speed up development, improve code quality, and solve complex technical problems while taking full responsibility for the code that reaches production.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6), HTML5, CSS3, SCSS

Backend: PHP (Yii2), Node.js, Express

Databases: MySQL, PostgreSQL, MongoDB

Developer Productivity: ChatGPT, Claude Code, GitHub Copilot, Prompt Engineering, Git, REST APIs, AWS, CI/CD

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER | Wheelie Car Finance | 2024 - Present

- Serve as the primary developer and technical owner of the company's business-critical CRM and vehicle financing platform using React, PHP/Yii2, and MySQL.
- Designed and implemented end-to-end vehicle-financing workflows covering customer onboarding, loan calculations, document processing, status tracking, and internal back-office operations.
- Translate business and operational requirements into production-ready features, managing database schema design and building secure backend services.
- Developed financial calculators and workflow automations that reduced manual application processing time by approximately 40% by centralizing customer, vehicle, and financing data within the CRM.
- Reduced average page load times by approximately 35% through database query optimization, backend caching, and frontend lazy loading.
- Provide ongoing production support for a business-critical system, diagnose cross-stack issues, and deliver urgent fixes and high-priority features with minimal disruption to daily operations.

FREELANCE FULL-STACK DEVELOPER | 2022-2024

- Developed and delivered responsive web applications using React, Node.js, Express, and relational/NoSQL databases for various client business needs.
- Built reusable UI components, secure authentication systems, custom admin dashboards, and seamless integrations with third-party REST APIs.
- Worked directly with clients to define technical requirements, scope MVPs, and deploy production features from initial wireframes to server hosting.
- Diagnosed frontend bottlenecks using Chrome DevTools and improved page load times by up to 50% through asset optimization, code splitting, and state management improvements.

CAD ENGINEER | DATAMAP G.I.S GROUP | 2020-2022

- Created technical drawings and engineering schematics while working in a structured, deadline-driven technical environment.

SELECTED PROJECTS

Critic - Responsive movie and TV discovery application built with React and TypeScript, featuring real-time search (debouncing), pagination, and integration with public REST APIs.

Personal Portfolio - Clean, modern portfolio website developed with React and SCSS to showcase full-stack capabilities, independent architecture, and professional experience.

EDUCATION

CODING ACADEMY - Full-Stack Web Development Program

July 2022 - November 2022

SHENKAR COLLEGE - Practical Engineer

2016-2019

LANGUAGES

Hebrew - Native

English - Fluent

Russian - Native
