PROFILE

Full-Stack Developer with hands-on experience designing, developing, and maintaining production web applications across modern frontend, backend, and database technologies. Experienced in building scalable business systems, owning features end-to-end, and translating business requirements into reliable technical solutions. Passionate about clean architecture, performance optimization, and delivering production-ready software.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6), HTML5, CSS3, SCSS

Backend: PHP (Yii2), Node.js, Express

Databases: MySQL, PostgreSQL, MongoDB

Tools & Platforms : Git, GitHub, GitHub Copilot, Claude Code, ChatGPT, REST APIs, AWS, CI/CD

PROFESSIONAL EXPERIENCE

FULL-STACK DEVELOPER | Wheelie Car Finance | 2024 - Present

- Serve as the sole Full-Stack Developer responsible for the company's business-critical CRM and vehicle financing platform, built with React, PHP (Yii2), and MySQL.
- Design, develop, and maintain end-to-end financing workflows, including customer onboarding, loan processing, document management, payment calculations, and internal operational tools.
- Translate business requirements into scalable technical solutions while owning database design, backend services, and frontend implementation.
- Build and optimize internal tools that automate manual workflows, improve operational efficiency, and reduce processing time for financing applications.
- Optimize application performance through database query improvements, backend caching, frontend lazy loading, and continuous code refactoring.
- Troubleshoot and resolve production issues across the full technology stack while delivering high-priority features with minimal impact on business operations.
- Collaborate directly with business stakeholders to define requirements, prioritize features, and deliver production-ready solutions.

FREELANCE FULL-STACK DEVELOPER | November 2022 - May 2024

- Designed and developed responsive business websites and web applications using React, Node.js, Express, and SQL/NoSQL databases.
- Built secure authentication systems, custom admin dashboards, contact forms, and third-party REST API integrations.
- Managed projects from initial client requirements and technical planning through deployment, testing, and production support.
- Optimized application performance, responsiveness, and SEO while ensuring maintainable and scalable codebases.

CAD ENGINEER | DATAMAP G.I.S GROUP | 2020-2022

- Created technical drawings and engineering schematics while working in a structured, deadline-driven technical environment.
