PROFILE

Full-Stack Web Developer with 3+ years building and shipping production systems end-to-end, React frontends, Node.js/PHP backends, REST APIs, and relational databases. Experienced across the full software development lifecycle: business requirements, architecture, development, testing, deployment, and production support. Comfortable with SQL, Git-based workflows, and AI-assisted development (Claude, GitHub Copilot), including reviewing and validating AI-generated code. Takes full ownership of features and ships clean, maintainable, production-ready software.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Responsive Design

Backend: Node.js, Express, PHP (Yii2), REST APIs, Authentication & Authorization

Databases: PostgreSQL, MySQL, MongoDB, SQL query design & optimization

Version Control: Git, GitHub, Feature Branches, Pull Requests, Code Reviews

Tools & Platforms: GitHub Actions, Vercel, AWS, Clean Architecture, Documentation

AI-Assisted Development: Claude Code, GitHub Copilot — accelerating development, reviewing AI-generated code, debugging, refactoring, and validating production-ready implementations

PROFESSIONAL EXPERIENCE

Full-Stack Developer | Wheelie Car Finance | 2024 – Present

- Sole Full-Stack Developer owning the company's business-critical CRM and vehicle-financing platform (React, PHP/Yii2, MySQL) from database design through backend services to frontend implementation.
- Built and maintain end-to-end financing workflows: customer onboarding, loan processing, document management, payment calculations, and internal operational tools.
- Automated manual workflows with internal tools, reducing financing-application processing time by 25% and cutting repetitive manual data entry across the team.
- Improved application performance through database query optimization, backend caching, and frontend lazy loading, reducing core CRM dashboard and financial report load times by 30%.
- Debug and resolve production issues across frontend, backend, REST APIs, and database layers, while shipping high-priority features with minimal disruption to business operations.
- Partner directly with business stakeholders to define requirements, prioritize the roadmap, and deliver production-ready solutions.

Freelance Full-Stack Developer | Nov 2022 – Present

- **Indicator (indicator.co.il):** Built and shipped a production e-learning platform for stock-market courses (Next.js, TypeScript, PostgreSQL): credit-card payment processing with automated invoicing and transactional emails, a student area with lesson player and progress tracking, and full user authentication (Clerk). Designed a custom CMS from scratch for live, in-place editing of all site content, plus an admin panel for managing courses, students, and purchases — deployed on Vercel, serving paying customers end-to-end.
- Developed and deployed an AI-powered educational web application utilizing Next.js/Vercel, handling end-to-end architecture, UI design, branding, and dynamic feature implementation.
- Managed projects end-to-end — requirements, technical planning, deployment, testing, and production support.
- Optimized performance, responsiveness, and SEO while keeping codebases maintainable and scalable.
